Hands-on Exercise No. 2

Data Analytics & Business Intelligence

DigiSkills 3.0 Batch-03

Name:	Zain Latif
Date:	14-05-2026
Course:	Data Analytics & Business Intelligence

Task1: Remove all empty rows from the dataset using Power Query Editor. (2-Marks)

the dataset contains several completely empty rows with no values in any column. These rows will cause errors in calculations and reports

The screenshot displays the Power Query Editor interface. The main area shows a table with 23 rows and 7 columns: Row ID, Order ID, Day, Month, Year, Ship Mode, and Ship Date. The data includes various orders from 2018 to 2020. The 'Applied Steps' pane on the right shows the following steps: Source, Navigation, Changed Type, and Removed Blank Rows. The status bar at the bottom indicates '20 COLUMNS, 999+ ROWS' and 'Column profiling based on top 1000 rows'.

Task2: Identify and remove duplicate rows so that each transaction appears only once.

find that some transactions have been accidentally entered twice in the dataset (identical values across all columns)

Task 5: Split the column into three separate columns named: Country, State, and City.

The dataset contains a column named Country-State-City that combines Country, State, and City information using hyphens as separators. For example: United States-Kentucky-Henderson

The screenshot displays the Microsoft Power Query Editor interface. The main area shows a table with the following columns: Customer Name, Segment, Country, State, City, and Region. The data is organized into rows, with the first row being a header. The formula bar at the top shows the MEX formula: `= Table.RenameColumns(#"Changed Type1",{{"Country-State-City.1", "Country"}, {"Country-State-City.2", "State"}, {"Country-State-City.3", "City"}}`. The right sidebar shows the 'APPLIED STEPS' list, which includes: Source, Navigation, Changed Type, Removed Blank Rows, Removed Duplicates, Capitalized Each Word, Merged Columns, Renamed Columns, Split Column by Delimiter, and Changed Type1. The bottom status bar indicates '20 COLUMNS, 999+ ROWS' and 'Column profiling based on top 1000 rows'.
