

Hands-on Exercise No. 1
DigiSkills 3.0 Batch-03
Data Analytics and Business Intelligence

Total Marks: 10
Due Date: 30/04/2026

Instructions:

Please read the following instructions carefully before submitting this Hands-on Exercise:

- Use MS Word to prepare exercise solution.
- You may consult tutorials and videos if the concept is not clear.
- Your submitted exercise will not be considered/counted if:
 - It is submitted after due date.
 - It is not in the required format (.doc or .docx)
 - It does not open, or file is corrupt.
 - It is copied (partial or full) from any source (websites, forums, students, etc.)

Learning Outcome:

After completing this exercise, you will be able to:

- Combine data from different workbooks by using simple lookup techniques.
- Highlight important information in your data to quickly understand important values.
- Use PivotTables to easily summarize and explore large amounts of data.
- Create simple charts and reports to clearly explain your data to others.

Problem Statement

Note: All hands-on exercises are connected. The final data file from Exercise-1 will be used in Exercise 2, and so on. After each exercise, update and save your data file for the upcoming exercises.

Data File download link:

<https://lms.digiskills.pk/Courses/DBI101/Downloads/Sales%20Report-%20for%20Hands-on%20Exercise%201.xlsx>

Scenario: You are working as a data analyst in a retail company where sales data are stored across multiple Excel files. Your task is to consolidate and analyze this data to identify high performing sales and understand category-wise contributions to overall business performance for better decision-making.

Tasks:

1. Download the Excel Data file from the given link.
2. Use XLOOKUP to fetch Sales, Quantity, Discount, and Profit columns from the *Sales Data* workbook into your current Data workbook based on the matching Product Name. (Marks – 4)
3. Use Conditional Formatting on the Sales column to highlight all values that are greater than 100. (Marks – 2)
4. Create a Pivot Table to summarize total Sales by Category. (Marks – 2)
5. Create a Pie Chart to visualize total Sales by Category. (Marks – 2)

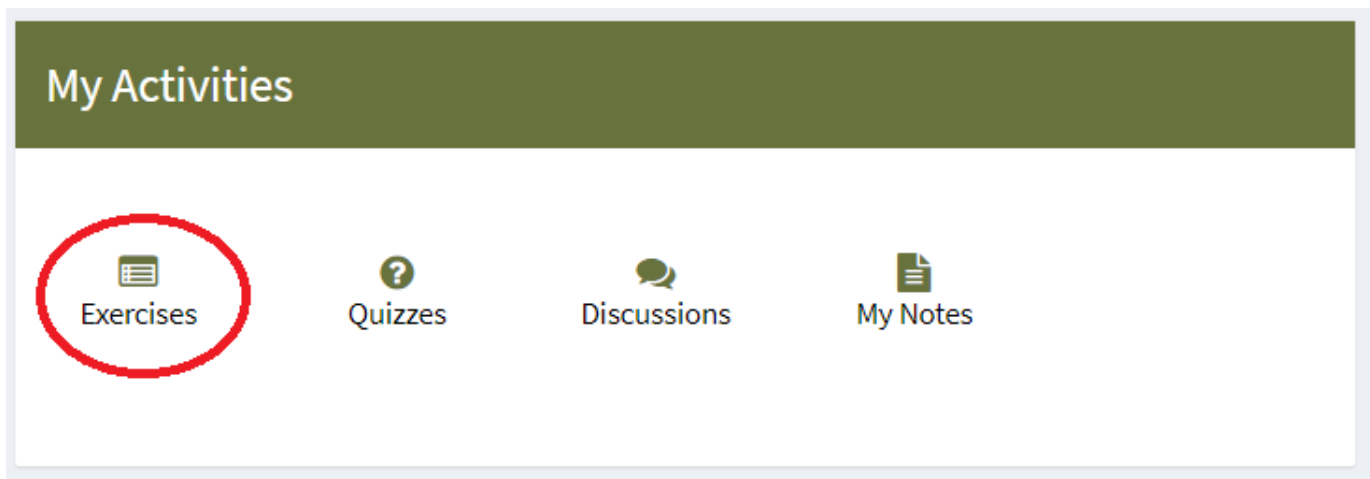

NOTE: Provide Screenshots of each step in MS Word File and save this MS-Excel date file for upcoming Exercises.

BEST OF LUCK ☺

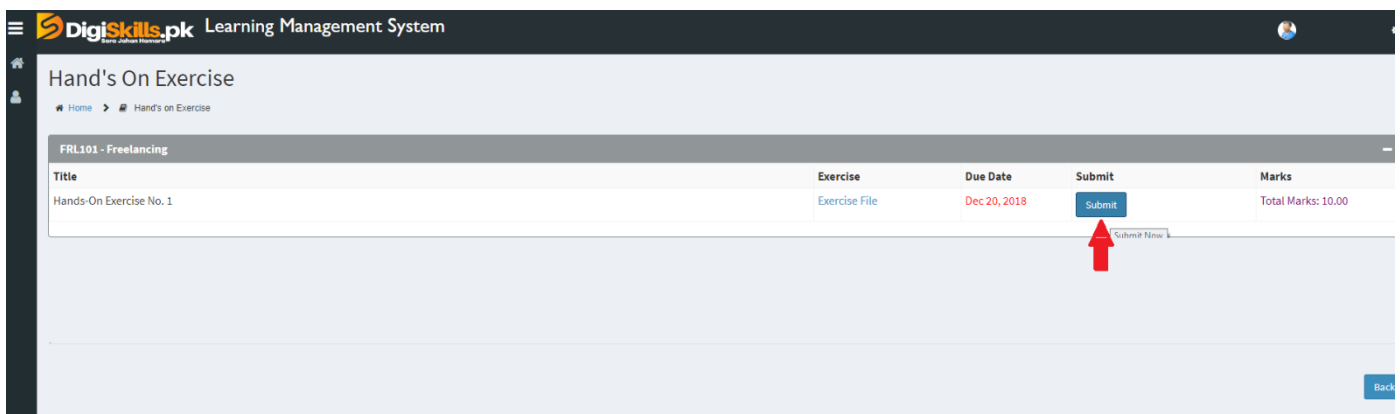

How to submit solution file on LMS?

Please perform the following steps for submitting your solution using LMS:

- 1) Login to the LMS
- 2) Click on the **Exercises** button within the **My Activities** section

- 3) Click on the submit button to upload your Solution.

- 4) Keep in mind to upload your Solution in .doc or .docx format
