**Hands-on Exercise No. 3**  
**DigiSkills 3.0 Batch-03**  
**Data Analytics and Business Intelligence**

**Total Marks: 10**  
**Due Date: 04/06/2026**

**Instructions:**

Please read the following instructions carefully before submitting this Hands-on Exercise:

- Use MS Word to prepare exercise solution.
- You may consult tutorials and videos if the concept is not clear.
- Your submitted exercise will not be considered/counted if:
  - It is submitted after due date.
  - It is not in the required format (.doc or .docx)
  - It does not open, or file is corrupt.
  - It is copied (partial or full) from any source (websites, forums, students, etc.)

**Learning Outcome:**

After completing this exercise, you shall be able to:

- Create calculated columns to analyze delivery performance.
- Develop DAX measures for key sales metrics using iterator functions.
- Validate and present results effectively using a Matrix visual.

## **Problem Statement**

**Note:** The hands-on exercises are linked to each other, to complete this exercise, use the completed data file of your Hands-on Exercise 1 & 2. Therefore, to complete Hands-on Exercises 3, and 4, it is necessary to complete the previous hands-on exercises first.

**Scenario:** You are a Data Analyst for a retail company who has completed the data cleaning process. Now, your task is to enhance the dataset by creating meaningful categories and key sales metrics to analyze business performance and ensure the accuracy of results through proper validation from a reporting view.

### **Tasks:**

#### **1. Create calculated columns: (Marks – 3)**

- To categorize sales into **High** and **Low** based on the Sales value, where values greater than 100 are labeled as High and others as Low. Name the new column as **Sales Category**
- To classify records based on discount, labeling entries with zero discount as “**No Discount**” and others as “**Discount Applied**”. Name the new column as **Discount Category**.

#### **2. Create calculated measures: (Marks – 5)**

- Total Sales (Sum of Sales)
- Qty Sold (Sum of Quantity)
- Total Orders (Count of Order ID)
- Total Profit (Calculate by multiplying quantity by profit) using iterator function.

#### **3. Validate all the results of calculated measures by using the Matrix visual. (Marks – 2)**

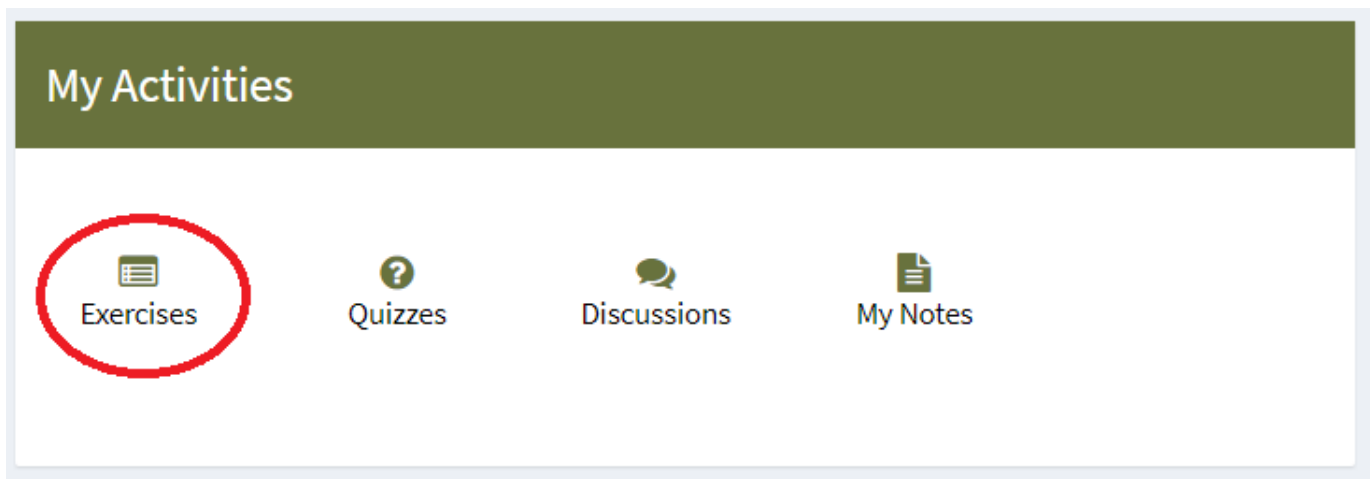

**NOTE:** Provide Screenshots of each step in MS Word File and save the data file for Hands-on Exercise 4.

BEST OF LUCK ☺

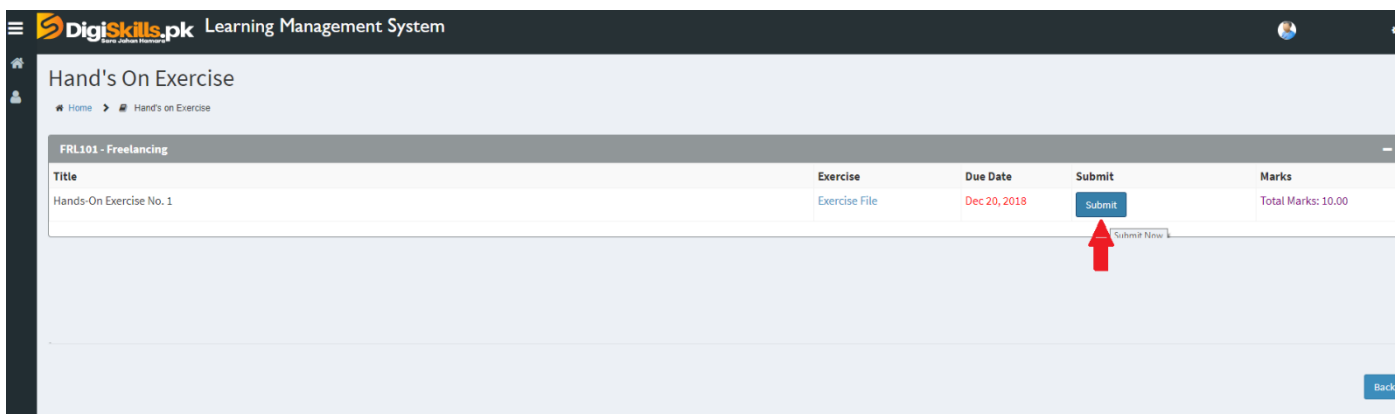

## How to submit solution file on LMS?

Please perform the following steps for submitting your solution using LMS:

- 1) Login to the LMS
- 2) Click on the **Exercises** button within the **My Activities** section

- 3) Click on the submit button to upload your Solution.

- 4) Keep in mind to upload your Solution in .doc or .docx format
